Education

University of Florida

B.A., Statistics and Economics (GPA: 3.84/4.00)

Aug 2026

Gainesville, FL

- **Achievements:** cum laude
- **Coursework:** Time Series and Forecasting, Programming I (Python), Linear Algebra, Multivariate Statistics, Experimental Design, Regression Modeling, Differential Equations

EXPERIENCE

University of Florida - Human Resources | *HR Analytics Intern*

May 2026 - Aug 2026

- Reconciled 20+ data sources covering 33,000+ university employees during the PeopleSoft to Workday migration, using SQL to clean, join, and validate records and identify missing data, duplicates, and inconsistent coding
- Co-developed a logistic regression model predicting each employee's probability of retiring in the next year (91.5% accuracy), and modeled retirement timing with survival analysis, including a time-varying covariate model
- Built an agent that drafts interview-scheduling emails and updates a pipeline tracker for recruiter review, handling routine coordination tasks; cut manual follow-ups by about 60%
- Analyzed 1,000+ public job postings to support workforce reporting and compensation analysis

University of Florida - Information Technology | *HPC Systems Intern*

Aug 2025 - Mar 2026

- Supported workloads on one of the largest university supercomputing environments in the U.S., with approximately 60,000 CPU cores and NVIDIA GPU infrastructure used for AI/ML and scientific computing.
- Designed a retrieval-augmented generation (RAG) chatbot on Claude by indexing and organizing internal technical documentation to automatically answer common HPC questions, reducing ticket requests by 30%.

ZapIntern | *Database Engineer*

Feb 2024 - May 2025

- Designed MongoDB data architecture for student, resume, job, recruiter, and application data using Node.js and Express.
- Built data pipelines powering 7,600+ internship listings across multiple recruiting seasons.
- Built queue-based infrastructure supporting 50+ application agents before transitioning workflows to AI automation.

University of Florida - Mathematics Department | *Learning Assistant*

Aug 2023 - Dec 2023

- Managed a Calculus 1 section of 20 students through weekly office hours and grading assignments.

Skills

Certificates: Databricks Certified Data Engineer Associate, Microsoft Certified: Power BI Data Analyst Associate, SnowPro Associate, Securities Industry Essentials (FINRA)

Data Engineering: ETL pipelines (ingestion, transformation, load), dimensional/star-schema design, metadata management, semantic models & ontologies, data quality, data management

Programming: Python, R, SQL, MATLAB, SAS

Tools & Platforms: Git/GitHub, Linux, PyTorch, Power BI, ArcGIS, MongoDB, Snowflake, Databricks

Extracurricular

University of Florida - Sports Analytics Club | *Student Leader*

Feb 2023 - May 2025

- Combined and cleaned large, multi-source player-performance datasets in SQL for a baseball analytics collaboration with the Tampa Bay Rays, tracking performance across dozens of metrics.
