EDUCATION

University of Florida Aug 2026
B.A. in Statistics and Economics

- **GPA:** 3.84/4.00
- **Honors & Scholarships:** UF Honors Program, Davis United World College Scholar (Full Ride)
- **Relevant Coursework:** Econometrics, Time Series, Regression Analysis, Programming I (Python), Linear Algebra, Differential Equations, Multivariate Statistics, Categorical Data Analysis, Complex Variables with Applications

University College London Sep 2024 – Jan 2025
Study Abroad

WORK EXPERIENCE

HR Intern – *Employment Operations & Classification and Compensation* May 2026 – Aug 2026
University of Florida, Human Resources | Gainesville, FL

- Resolved ePAF issues in PeopleSoft by checking employee data and correcting unconfirmed records, contacting Equifax for troubleshooting when needed
- Served as a point of contact for college-level HR liaisons on onboarding, immigration, and payroll deduction questions
- Supported the migration of employee records into Workday by using SQL and Excel to clean PeopleSoft data, standardize addresses, resolve missing fields, and reconcile duplicate employee IDs
- Developed a logistic regression model to estimate employees' probability of retiring within one year

Research Computing Support and Applications Intern - *Research Computing* Aug 2025 – Mar 2026
University of Florida, Information Technology | Gainesville, FL

- Configured software environments, installed dependencies, and troubleshot research applications on HiPerGator, UF's high-performance computing (HPC) cluster supporting large-scale data analysis, and machine learning
- Analyzed historical Slurm job accounting data in Python to identify excessive resource requests and recurring failure patterns, recommending memory, CPU, and runtime settings to reduce wasted capacity and prevent job failures
- Triaged support requests through the ticketing system and Slack

Co-Founder Jan 2024 – Oct 2024
ZapIntern | Gainesville, FL

- Helped launch ZapIntern, an AI-powered job application platform, developing the listing backend supporting 7,600+ internship listings and one-click application requests
- Developed a Node.js pipeline to ingest internship listings from Handshake and other job boards into PostgreSQL JSONB staging tables

Learning Assistant Aug 2023 – Dec 2023
University of Florida, Mathematics Department | Gainesville, FL

- Supported a Calculus 1 section of ~20 students by holding 15 weekly office hours and grading problem sets and exams
- Worked together with the course instructor to write quiz and test questions on limits, derivatives, and integrals
- Responded to student questions through Canvas and GroupMe, clarifying course concepts and assignment requirements

RESEARCH

Crop Yield & Disease Modeling, Capstone Project | Link: Paper (PDF) | Dashboard Aug 2025 – Dec 2025
Rothamsted Research

- Cleaned wheat disease and yield records across study years in Python, integrating field-trial and weather data to examine infection and crop performance
- Built mixed effects models to evaluate weather-related disease patterns and compared wheat varieties for disease resistance and changes in infection over successive growing seasons.

SKILLS

Programming: Bash, Python, SQL, MATLAB
Data Analytics Tools: R, Excel, Power BI
Statistical Methods: Linear Regression, Logistic Regression, Mixed-Effects Modeling, Poisson Regression, Fixed-Effects Regression, Analysis of Variance (ANOVA), ARIMA Modeling, Clustering, Factor Analysis, PCA
